Defect Summary Login Page - User Unable to Sign In with Valid Credentials

Issue Type Bug / Defect

Priority High

Severity Major

- Environment**
- Application: Web Application
 - Environment: UAT/Production/QA
 - Browser: Chrome 127.0 (example)
 - OS: Windows 11

Description

Users are unable to log in to the application even when valid credentials are entered. The system displays an error message and prevents access to the application.

Preconditions

1. User account exists and is active.
2. User has valid login credentials.
3. Application is accessible.

Steps to Reproduce

1. Navigate to the application login page.
2. Enter a valid username.
3. Enter a valid password.
4. Click the **Login** button.

Actual Result

- Login fails.
- Error message displayed: *"Invalid credentials"* (or actual error observed).
- User remains on the login page.

Expected Result

- User should be successfully authenticated.
- User should be redirected to the application home/dashboard page.

Frequency

100% Reproducible

Business Impact

Users cannot access the application, resulting in disruption of normal business operations.

Attachments

- Screenshot of error message.
- Browser console logs.
- Network logs (if available).
